Memory Stopwatch QuickStart

3/14

To begin push **Mode** button (on top) until display is as shown.

- To start timing push **Start/Stop**. Lap times will be on middle line. Total run time to that lap is on the top. Continuing total run time is on the bottom.
- To get individual consecutive laps push **Lap/Reset** each lap.
- To stop timing push **Start/Stop**. You can resume by pushing **Start/Stop** again.
- To stop timing **and reset** push **Start/Stop**, then **Lap/Reset**. Lap count goes to 000.

To recall Memory push **Recall**. Display will change (see). Use **Recall** to scroll up thru memories. Lap number is shown at **Lap Count** on display. Push **Start/Stop** to get Average Lap Time. Push **Mode** to exit Memory. Memories are erased when you reset, then start timing again.

See full instructions for more details if needed.

- Battery access is on the back. Remove the clip first. Replace w. a quality CR 2032 'coin' battery. Note polarity - + is up.
- Do not drop the watch.
- Keep it away from strong magnetic fields (caster camber gauge magnets?).
- Keep the watch clean and dry.
